

JOÃO VICTOR FERREIRA PALHA

FULLSTACK DEVELOPER

I have been a Javascript developer for the past 2 years, having experience in both corporate environments and as a freelance professional working on complete projects. Throughout my journey, I have collaborated with a variety of technologies and architectures to ensure optimal performance for my code.

TECHNOLOGIES

JAVASCRIPT | REACTJS | SASS | NODEJS |
TYPESCRIPT | GIT | SQL | Docker |

EXPERIENCES

FREELANCER, BRAZIL **FULLSTACK DEVELOPER**

JANUARY DE 2021 - CURRENT

Coffee Delivery — Frontend Project ([Link](#))

A web application built in React to create a sleek and interactive design for a fictional coffee delivery store. TypeScript and styled-components were utilized as complementary technologies to enhance the development process.

Aspop Web Site — Fullstack Project ([Link](#))

A full-stack project developed in Node.js for the backend and React for the frontend, both utilizing TypeScript. This application is designed to enhance the organization of information for the Association of Official Forensic Experts of Pará, specifically for scientific dissemination and news related to the field of expertise

Find a Friend — Backend Project ([Link](#))

An API created as an intermediary for organizations with animals available for adoption and users seeking new furry friends. Developed entirely in Node.js, the API leverages technologies such as Fastify, PostgreSQL, TypeORM Prisma, JWT, Vitest, Docker, and TypeScript.
